

## TECHNICALSPECIFICATIONS

### Boozzter™ pan feeding system for cockerels

ANIMAL INFO		
Number of birds/pan		10
Average age at removal (weeks)		65
Average weight at removal (kg)		4,5
Max. daily feed intake (grams/bird)		130 - 165
GENERAL TECHNICAL INFO		
Pan:	Material	polypropylene (nylon top support)
	Diameter	488 mm x 325 mm
	Average pan contents (*)	350 grams
	Quantity per feed level	approx. 16 grams
	Grill spacing width	104 mm
	Grill spacing height	149 mm
Transport:	Material tubes	galvanized steel
	Outside diameter tube	44,5 mm
	Feed amount	600 grams/meter tube
	Max. pellet diameter	4 mm
	Power unit	0,55 kW - 3/4 HP - 3 phase 50 Hz -560 RPM
	Feed transport capacity	700 kg/hour
	Max. length of the line :	1 pan/tube 150 m 2 pans/tube 150 m 3 pans/tube 130 m

(\*) Based on a specific weight of 0,65 kg/dm<sup>3</sup>.

**Pan feeding system  
for cockerels**

**ROXELL®**

## Boozter™

### 1 Comfortable eating for males only

- The feeder lines hang beyond the reach of the hens.
- The wide grill openings offer cockerels with full-grown combs easy and comfortable access to the feed. (A)
- Also after spiking all males have plenty of chance to eat.
- An anti-swing clamp stabilizes the pan on the tube. The feed remains in the central part of the pan. (B)

### 2 Fast and uniform feed distribution

- The high capacity auger and the unique patented pan design provide a fast and even feed distribution over the pans.

## Boozter™

### 3 Maximum feed savings

- The special stepped pans with 10 individual feeding trays exclude selective pecking and feed waste. (A)
- Boozter™ is equipped with a handy feed level adjustment ring. (C)

### 4 Durable, 10-year guarantee (\*) on the complete pan

- The pan parts are of durable UV-stabilized plastics, which resist all commonly used cleansing agents and detergents.
- A solid hinge allows easy, thorough cleaning, without removing the pans. (D)

(\* Degressive)
