

Automatic Egg Packer - Hatching Eggs

The Prinzen PSPC 5 is used for packing hatching eggs directly and carefully onto setter trays with a parallel matrix and on 30-cell carton or plastic trays. The proven points setting system (*a Prinzen innovation*), with a points down correction of > 99,7% is unequalled. Gentle egg transfer, ease of operation & cleaning make this packer a successful unit in the PSPC series. The payback time of this hatchery packer is very short thanks to low energy costs and reduction of operating costs. Reasons enough that explain the worldwide success of the PSPC 5!

Ideal packer for breederfarms

- Suitable for almost every setter tray available with straight matrix (10x15,9x10)
- Easy switch from setter tray to 5x6 tray (plastic/cardboard)
 - Compact & flexible lay-out: fits into almost every egg room

Better results

- > 99,7% points down correction
- Considerable reduction in cracked eggs in comparison with handpacking
- Gentle egg handling
- Top class print results (Ovoprint or Egg Flex stamping)
- Improvement of hatchability

Durable and low maintenance

- Stainless steel for easy cleaning
- Durable and welfare friendly materials
- Vital parts are good accessible for maintenance
- Rapid return on investment
